SUMMARY

Results-driven Frontend Developer specializing in HTML, CSS, and JavaScript with expertise in React having 2.6 years of experience working in Banking Domain, Committed to delivering exceptional user experiences and staying updated with emerging technologies.

EXPERIENCE

Software Engineer

Virtusa [HSBC]

1. Client Off-Boarding Application

📅 05/2022 - Present

- Developed Banking client off-boarding application using React Js, Webpack.
- This ensures a seamless experience for clients transitioning out of the system, optimizing navigation and scalability.
- Implemented Atomic design pattern which helped to create more consistent UI with better maintainability.
- Used Redux-Thunk to manage global state and asynchronous logic and used(ES6) JavaScript on top of micro-frontend architecture.
- Used Module federation to build scalable, modular applications by facilitating the seamless integration of independently developed modules introducing dynamic routing.
- Extensively used Json for dynamic component rendering in react.
- Performed extensive unit tests using Jest and react-testing-library.
- Worked in Agile methodologies for incremental development to deliver better application.

2. Client On-Boarding Application

📅 08/2021 - 04/2022

- Maintained on-boarding application which is built on ReactJs, Redux-Thunk, and Hooks.
- This application focuses on creating a responsive and efficient on-boarding experience for clients, utilizing modern JavaScript (ES6) for maintainable code.
- Boosted performance by 30% Using advanced features like debouncing and memoization.
- Implemented shimmer UI to enhance user experience during content loading.
- Refactored the code for better efficiency, readability, and performance.
- Resolved vulnerability issues.

CERTIFICATION

Exam AZ-900: Microsoft Azure Fundamentals.

LANGUAGES

English	Advanced	Hindi	Advanced
Marathi	Native		

EDUCATION

B.E in Electronics & Telecommunication

MGM College of Engineering and Technology, Kamothe, Navi Mumbai.

📅 07/2016 - 10/2020

SKILLS

Frontend Development:

React.Js, Redux, Redux-Thunk, Javascript (ES6), HTML5, CSS3, Bootstrap, Tailwind, Redux-Toolkit, React Router DOM, React Hooks, Typescript

Backend Development

Node.Js, Express.Js

Database:

MS SQL, Oracle, Mongo DB

Other:

JSON, Webpack, Babel, Azure, Git, Github, Jest, JSON Web Token, G3

PERSONAL PROJECTS

1. HungerHub (Swiggy Clone) : React-Based Food Ordering App

Built highly scalable, responsive app using React, JavaScript, Tailwind CSS, Redux, Parcel.

- Implemented Search Feature Using Debouncing and throttling to make app work faster.
- State Management with Redux, Custom Hooks for performing task like Fetching API from Swiggy.

2. Netflix Clone : Responsive Movie Watching And Recommendation App

An Innovative Movie App Powered by React, Redux, Tailwind, ESBUILD, and OpenAI for Lightning-Fast Loading and Responsive Performance.

- Secure User Authentication with Firebase. Implemented Custom Hooks for Fetching Movie from Different Genres, Efficiently movie and rendering with Redux.
- Open-AI integration Delivers personalised movie recommendations. Live API Integration From TMDB. Implemented Memoization And Various React Concepts.
